

PART I-Form A

Form A -No risk of significant effect

**DECLARATION BY THE AUTHORITY RESPONSIBLE FOR MONITORING
SITES OF NATURE CONSERVATION IMPORTANCE¹**

Responsible Authority **State Nature Conservancy of the Slovak Republic, Lazovna 10, 974
01 Banska Bystrica**

Having examined the project application **R1 Selence – Beladice highway**

which is to be located at cadaster **Nitra-Chrenová, Nitrianske Hrnčiarovce, Malý Lapáš,
Pohranice, Host'ová, Kolíňany, Čeladice, Beladice, Veľké Chrašť'any, Pustý Chotár,
Mlyňany, Tesáre nad Žitavou**

we declare that (tick the appropriate box):

The project is not likely to have significant effects on a site of nature conservation importance on the following grounds:

The planned highway is continuation of the planned R1 Nitra západ – Selence highway. It is planned in the hilly landform of the Žitavská pahorkatina with deeper cut valleys. It is spanned by 18 bridges in these valleys. The highway is lined south of Dolná Malanta, Pohranice, Host'ová, Čeladice municipalities and ends ahead of the Tesáre nad Žitavou crossroad, where it connects with the segment of the R1 Beladice - Tekovské Nemce highway.

There are no Natura 2000 sites (sites of Community importance - SCIs and special protection areas - SPAs) in instant distance from the planned highway. The closest SCI (the SKUEV0130 Zoborské vrchy) is situated about 1.3 km north of the Selence crossroad. The nearest SPA (SKCHVU031 Tribeč) is situated about 4.9 km north of the segment of the highway. Situation is specified on the enclosed map.

All project activities have been approved according to the national legislation (territorial planning or building permit procedure) and to all of them the official opinion from the involved nature and landscape protection Authority was needed.

Therefore an appropriate assessment required by Article 6 (3) of Directive 92/43/EEC was not deemed necessary.

~~Following an appropriate assessment, according to Art. 6(3) of Directive 92/43/EEC, the project will not have significant negative effects on a site of nature conservation importance~~

A map at scale of 1: 50.000 (or the nearest possible scale) is attached, indicating the location of the Project as well as the site of nature conservation importance concerned if any.

Signed: **Ing. Andrej Vidra**
